ARCHITECTURE FOR A CHANGING WORLD

Recent social, political and environmental upheavals have had a twofold effect on the built environment in Third World countries. They have destroyed the traditional cultural structure in rural areas, which has led to homelessness and the marginalisation of entire communities, and large-scale urbanization has become a powerful phenomenon of which the Islamic World is very much a part.

Such global changes have had a dramatic impact on the Jury for the Aga Khan Award for Architecture, whose selections for 1992 are presented here.

The projects selected this year, which address issues relevant to both the developing and developed world, are economically sustainable, humanistic solutions to difficult problems, and generate a new architectural language. They provide a valuable insight into an alternative design approach for both rural and urban environments.

Essays by Suha Özkan of the Aga Khan Award for Architecture, Mohammed Arkoun, Professor of Islamic Thought at the Sorbonne, Paris, and Arif Hasan, Pakistani architect and planner, place the projects within the context of the major social transition now underway, and an article by the late Hassan Fathy on Contemporaneity in the City provides a historical perspective.

Each award-winning project is described in detail by Charles Moore and Selma al-Radi, and they are comparatively reviewed by James Steele.

A brief history of Samarkand, where the awards were presented, completes this volume.

ACKNOWLEDGEMENTS

This volume represents a close collaborative effort between the Aga Khan Award for Architecture and Academy Editions. I would particularly like to thank the Publisher, Andreas Papadakis, who has made this project a reality, and each of the individual members of the Award Steering Committee and Master Jury for their valuable advice, as well as Drs Yıldırım Yavuz, Jamel Akbar, and Darab Diba of the Technical Review who provided essential information and help. I would like to extend gratitude to Nicholas Bulloch and Hasan-Uddin Khan and Van Nguyen-Lam of the Aga Khan Trust for Culture. For their continual support during preparation and production, I am grateful to Dr Suha Özkan, Jack Kennedy, Farrokh Derakhshani, Nabil Chetouani and Richard McAllister of the Aga Khan Award for Architecture.

Like so many others in the field of architecture, I would like to make special acknowledgment of the efforts of His Highness The Aga Khan, whose interest, enthusiasm, and generosity have so profoundly benefited the practice and study of architecture today.
